Lively Kingdom | Park Security Training Guide

Introduction:

Hello, my name is (user), and I'll be your trainer today. Please pay close attention as we cover a lot of important information.

If you have any questions during the training, just say "PTS!" and I'll answer them. Let's get started!

Basic Information:

As a Park Security Officer, your main responsibility is to patrol the park and handle trollers or players who disrupt the game.

COMMANDS:

Once you join the game, you'll have access to the Security Radio channel and the !cuff command.

- !cuff (User): Use this to detain players who have committed a major offense or reached maximum warnings. Once you cuff a player, they cannot reset or leave the game—they'll be auto-recuffed if they try.

- To uncuff a player, use the !uncuff command, or have a supervisor use !clearcuff.

- !clockin: Use this command to start your shift. This lets your supervisors see how many security officers are active.

Remember, your supervisor may ask you to clock out if there are too many officers on the shift, and you'll need to switch servers.

The radio has 3 channels:
1. Channel 1: For direct communication with your supervisor.
2. Channel 2: For serious matters only.
3. Channel 3: For casual, off-duty conversations with other officers.

Any misuse of commands will lead to warnings and further consequences, which you can check by pressing the 'F' key on your keyboard.

WARNING SYSTEM:

When you encounter a troller or disruptive player, use the warning system to give them a chance to correct their behavior.

- Minor Offenses: A player can receive 2 warnings before being cuffed.
- Use :warn (User) (Reason) to issue a warning. A GUI will appear above the player's head showing their warning count.

Examples of warnable offenses:
- Trolling
- Being argumentative
- Refusal to comply
- Minor spamming
- Instigating drama
- Minor glitching

Make sure to give a verbal warning before each written warning.

MAJOR OFFENSES:

Certain actions require immediate action:
- Major Glitching: Glitching into restricted areas or excessive glitching.
- Exploiting: Using cheats to fly, teleport, etc.
- Circumventing Ban: Creating a new account to bypass a ban.

- Major Trolling: Players who have been warned 4 times and kicked 2 times.

Additional Information:

- Stay on task: Failing to do so may affect your rank.
- Supervisors: Listen to your supervisors, as they are trained for specific situations. They will have the "Park Security" role.
- If you need to clock out, and your supervisor isn't available, use the #clock-out sheets in the communications server.
- Professionalism: Always use proper grammar and remain professional. Failure to do so will result in consequences.

Final Notes:

Great job! Now, let's move on to some trivia. Does anyone have any questions before I pass you over to my helpers?

Good luck, everyone!
